

As we celebrate the first anniversary of our Internet radio program, Empowerment Hour – Online University, we are marking the start of our second year of real community empowerment by adding to our methodology heightened exposure of Black Newspapers and Black Businesses, including networking opportunities that will interlock these businesses across the country and around the globe.

The Preferred Business Program (PBP Solution) ***Providing Solutions to Empower your Opportunities***

In keeping with the building of an Economic Infrastructure in Black Communities across this country and around the world, Eady Associates is developing and selecting a group of Featured Businesses that it presents to Black and other communities around the globe. All selected businesses will have met the EA standard of excellence. Every business will be interviewed, and will sign a contract with EA which acknowledges that quality service with professionalism and integrity is their number one priority.

As part of our very affordable advertising packages your business or product will be featured not only on our website www.kermiteady.com, which reaches thousands of people throughout the country and around the world, but also in our weekly e-mail newsletter along with other promotional opportunities (Including the opportunity to appear on the Empowerment Hour Online University radio program).

We look forward to working with your business
(Graphic Design and Corporate Brand Development services are available upon request)
